Student's Weekly Report of Internship

Student Name:	**Thakkar Krinal Balkrushanbhai**			
Enrollment Number:	**231263116020**			
Name Of Organization:	**Demaze Technologies**			
External Guide Name:	**Deep Suthar**			
External Guide Contact details:	**Email:**	**info@demaze.in**	**Mob No:**	**7069633777**
Internal Faculty Guide Name:	**Prof. Himani Patel**			

Week 2: JavaScript Advanced & DOM

Monday:

DOM Manipulation: Accessing HTML elements

DOM manipulation allows JavaScript to interact with HTML elements on a web page. By accessing elements using methods like ID, class name, or tag name, developers can change content, styles, and structure dynamically. This helps in creating interactive and responsive web applications.

Dom.js

```js
let heading = document.getElementById("heading");
console.log(heading.innerText);

let paragraphs = document.getElementsByClassName("info");
console.log(paragraphs[0].innerText);
console.log(paragraphs[1].innerText);

let button = document.getElementsByTagName("button");
console.log(button[0].innerText);
```

Output (Console):

Welcome
JavaScript DOM Example
Internship Practice
Click

Tuesday:

Event handling

Event handling is the process of responding to user actions on a web page, such as clicking a button or submitting a form. Using JavaScript, developers can attach event listeners to HTML elements to perform specific actions when an event occurs. This makes web applications interactive and user-friendly.

- vents are user actions like click or submit
- Event handling responds to user interaction
- JavaScript listens for events on elements
- Improves interactivity of web pages
- Common events: click, change, submit

```js
let button = document.getElementById("btn");
let text = document.getElementById("text");

button.addEventListener("click", function () {
    text.innerText = "Button Clicked";
    console.log("Button Clicked");
});
```

Output (Console):

Button Clicked

Wednesday:

JavaScript ES6 features: Template literals, Destructuring

JavaScript ES6 Features

Template Literals:

- Introduced in ES6 to handle strings in a cleaner and easier way
- Use backticks instead of quotes for writing strings
- Allow variables and expressions to be inserted directly into strings
- Help improve readability and reduce string concatenation

Destructuring:

- Introduced in ES6 to extract values from arrays and objects
- Allows assigning multiple values to variables in a single statement
- Reduces repetitive code when accessing object properties or array elements

- Makes JavaScript code cleaner and more organized

Thursday:

Local storage & session storage

Local Storage

- Used to store data in the browser permanently
- Data remains available even after closing and reopening the browser
- Stores data in key–value pair format
- Commonly used for saving user preferences and settings

Session Storage

- Used to store data for a single browser session
- Data is removed automatically when the browser tab is closed
- Stores data in key–value pair format like local storage
- Commonly used for temporary data such as login session information

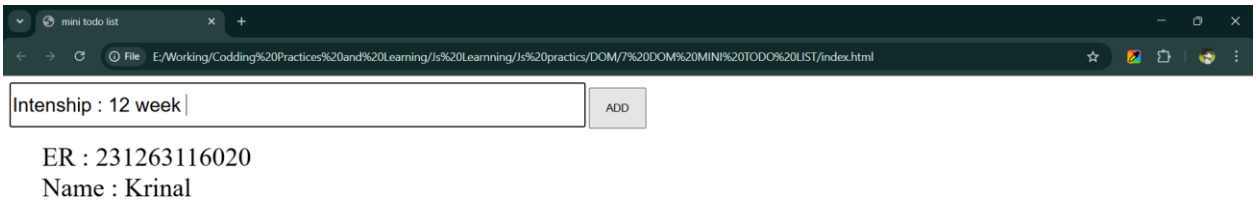
Friday:

Small project: To-Do List using JS and DOM

```
let mytext = document.getElementById("mytext");
let myul = document.getElementById("myul");
function myfun(){
        const newEL= document.createElement("li");
        newEL.innerText = mytext.value;
        myul.prepend(newEL);
        mytext.value = "";

}

```



ER : 231263116020
Name : Krinal

Summary of Work Done Till Date

- Learned DOM manipulation and accessing HTML elements
- Studied event handling and user interactions
- Learned ES6 features like template literals and destructuring
- Understood local storage and session storage
- Developed a To-Do List project using JavaScript and DOM

Plans for next week:

- Start learning React.js fundamentals
- Understand JSX syntax
- Learn component-based architecture
- Create basic React components

Total Working Hrs: _____ **Signature of Student:**

The above entries are correct and the grading of work done by Trainee is

Excellent	Very Good	Good	Fair	Below Average	Poor

Signature of External Guide with Company Seal: **Signature of Internal Guide**

Date: **Date:**
