Student's Weekly Report of Internship

Student Name:	**Thakkar Krinal Balkrushanbhai**			
Enrollment Number:	**231263116020**			
Name Of Organization:	**Demaze Technologies**			
External Guide Name:	**Deep Suthar**			
External Guide Contact details:	**Email:**	**info@demaze.in**	**Mob No:**	**7069633777**
Internal Faculty Guide Name:	**Prof. Himani Patel**			

1. Introduction of Company

Demaze Technologies is a leading IT company focused on **web development, software solutions, and full-stack applications**. The company specializes in **MERN stack development** (MongoDB, Express.js, React.js, Node.js) and trains interns in **real-world projects**.

2. Introduction of Project Internship

The internship project is a **MERN Stack Web Application**. During this internship, I learned:

- Core **JavaScript concepts**
- **React.js components and state management**
- **MongoDB database management**
- Connecting **frontend and backend using Express and Node.js**
- Building **small web applications and projects.**

3. Objectives of Internship

- Learn JavaScript basics and advanced concepts
- Develop **React components** and manage state/props
- Understand **CRUD operations** in MongoDB
- Integrate frontend with backend APIs
- Build **small projects** and understand real-world application structure

4. Weekly Work Details

Week 1: JavaScript Basics & Small Projects

Monday:

- Learned JavaScript variables, data types, operators.

```
main.js
main.js > ...
let name = "Krinal";
let age = 18;
let isAdult = true;
let college = "SETI";
let marks = null;
let result;
let subjects = ["Maths", "Science", "IT"];

console.log(typeof name);
console.log(typeof age);
console.log(typeof isAdult);
console.log(typeof college);
console.log(typeof marks);
console.log(typeof result);
console.log(typeof subjects);
```

Output

string
number
boolean
string
object
undefined
object

Tuesday:

- Learned conditional statements and loops

```js
for(let i = 1; i <= 5; i++) {
    console.log("Number:", i);
}
```

Output:
Number: 1
Number: 2
Number: 3
Number: 4
Number: 5

Wednesday:

- Functions and arrow functions

```js
function displayStudentDetails() {
    let name = "Krinal";
    let age = 18;
    let college = "SETI";

    console.log(name);
    console.log(age);
    console.log(college);
}

function addNumbers(a, b) {
    return a + b;
}

function checkEligibility(age) {
    if (age >= 18) {
        return "Eligible for internship";
    } else {
        return "Not eligible for internship";
    }
}

const showName = () => {
    let name = "Krinal";
    console.log(name);
};

const multiplyNumbers = (a, b) => {
    return a * b;
};

const getCollegeName = () => "SETI";

displayStudentDetails();
console.log(addNumbers(10, 5));
console.log(checkEligibility(18));
showName();
console.log(multiplyNumbers(4, 5));
console.log(getCollegeName());
```

Output:

Krinal
18
SETI
15
Eligible for internship
Krinal
20

Thursday:

- Arrays and objects

```js
//this is a Array

let subjects = ["Maths", "Science", "IT", "English"];

console.log(subjects[0]);
console.log(subjects[1]);
console.log(subjects.length);

subjects.push("Computer");
console.log(subjects.length);

// this is a object

let student = {
    name: "Krinal",
    age: 18,
    college: "SETI"
};

console.log(student.name);
console.log(student.age);
console.log(student.college);

student.age = 19;
console.log(student.age);
```

Output:

Maths
Science
4
5
Krinal
18
SETI
19

Friday:

- **Small project: Calculator using JS functions**

myCal.js

```javascript
// Addition
function add(a, b) {
    return a + b;
}

// Subtraction
function subtract(a, b) {
    return a - b;
}

// Multiplication
function multiply(a, b) {
    return a * b;
}

// Division
function divide(a, b) {
    if (b === 0) {
        return "Cannot divide by zero";
    }
    return a / b;
}

// Function Calls
console.log("Addition:", add(10, 5));
console.log("Subtraction:", subtract(10, 5));
console.log("Multiplication:", multiply(10, 5));
console.log("Division:", divide(10, 5));
console.log("Division:", divide(10, 0));
```

Output :

Addition: 15
Subtraction: 5
Multiplication: 50
Division: 2
Division: Cannot divide by zero

Summary of Work Done Till Date

- Learned JavaScript basics such as variables, data types, operators, conditions, and loops
- Studied functions, arrow functions, arrays, and objects
- Implemented basic logic building using JavaScript
- Developed a small calculator project using JavaScript functions

Plans for next week:

- **Learn advanced JavaScript concepts**
- **Understand DOM manipulation**
- **Practice event handling**
- **Build a small project using DOM**

Total Working Hrs: _____ **Signature of Student:**

The above entries are correct and the grading of work done by Trainee is

Excellent	Very Good	Good	Fair	Below Average	Poor

Signature of External Guide with Company Seal: **Signature of Internal Guide**
