Internal Faculty Guide Name:	Prof. Himani Patel			

Week 12 – Final System Testing & Documentation

Objective of Week 12

- Perform final system testing
- Fix all bugs and errors
- Improve performance
- Complete UI/UX final review
- Prepare final documentation

Monday – Full System Testing

Work Done:

- **Tested complete system flow:**
 - User registration & login
 - Admin login & dashboard
 - Job posting & applying
 - AI Resume Builder
 - Message panel
 - Notification system

- Checked data flow between frontend and backend

Code Used (Testing API Example):

```
// Test API for fetching jobs
app.get("/jobs", async (req, res) => {
  const jobs = await Job.find();
  res.json(jobs);
});
```

Explanation:

This API is used to fetch job data from the database. It was tested using Postman to ensure correct data retrieval.

Output:

- All modules were working together correctly
- Minor UI alignment issues were identified+

Tuesday – Bug Fixing

Work Done:

- Fixed issues found during testing:
 - Resolved login session expiration issue
 - Fixed delay in email notifications
 - Corrected message synchronization problem

Code Example (Session Fix):

```
// Session configuration
app.use(session({
  secret: "jobportal",
  resave: false,
  saveUninitialized: true
}));
```

Explanation:

This middleware maintains the user session so that users remain logged in without interruption.

Output:

- Login system became stable
- Notifications worked properly
- No data mismatch issues

Wednesday – Performance Optimization

Work Done:

- Optimized database queries
- Reduced API response time
- Improved dashboard loading speed

Code Example (Optimized Query):

```
// Fetch limited users for faster performance
app.get("/users", async (req, res) => {
  const users = await User.find().limit(10);
  res.json(users);
});
```

Explanation:

Instead of loading all users at once, only a limited number of records are fetched to improve performance.

Output:

- Faster system response
- Smooth dashboard experience

Thursday – UI/UX Final Review

Work Done:

- Reviewed complete UI:
 - Mobile responsiveness
 - Button alignment
 - Dashboard layout
 - Notification design
- Improved styling consistency

Code Example (UI Improvement):

```
.button {
  background-color: #4CAF50;
  color: white;
  padding: 10px;
  border-radius: 5px;
}
```

Explanation:

Improved button styling to make the interface more user-friendly and visually appealing.

Output:

- Fully responsive design
 - Clean and professional interface
-

Friday – Final Documentation**Work Done:**

- Prepared complete project documentation:
 - Project overview
 - Features and modules
 - Code snippets
 - Outputs and screenshots
- Organized report for final submission

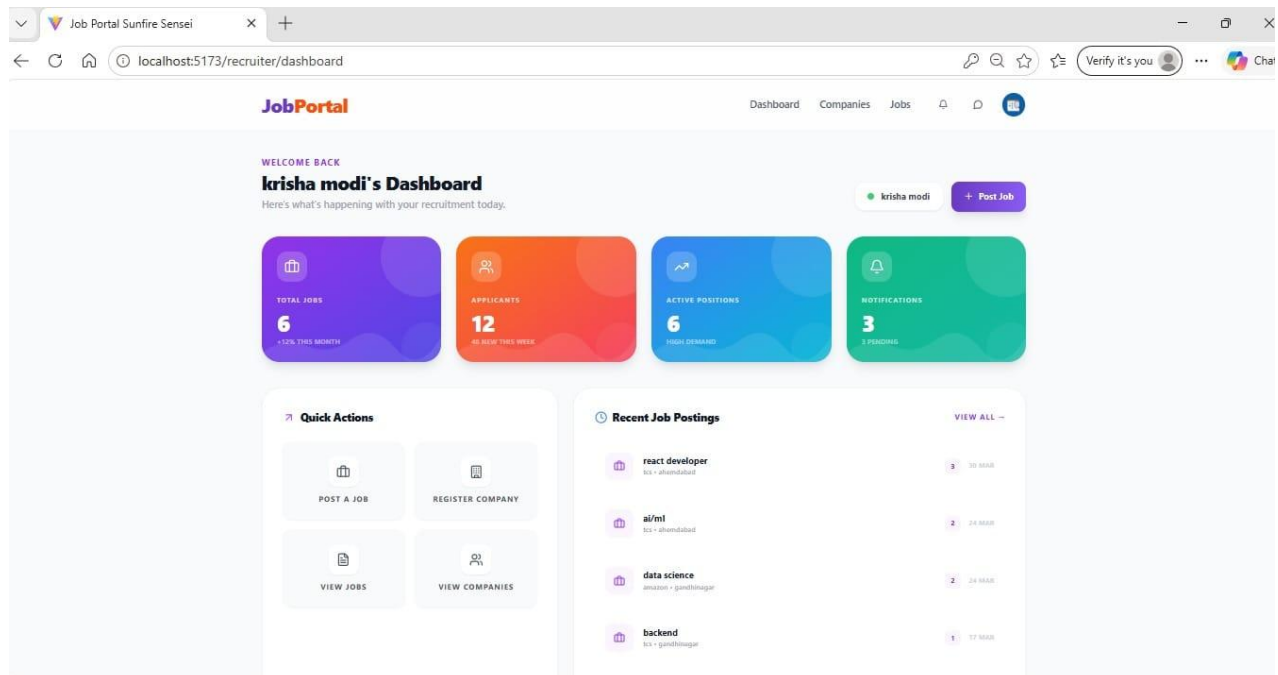

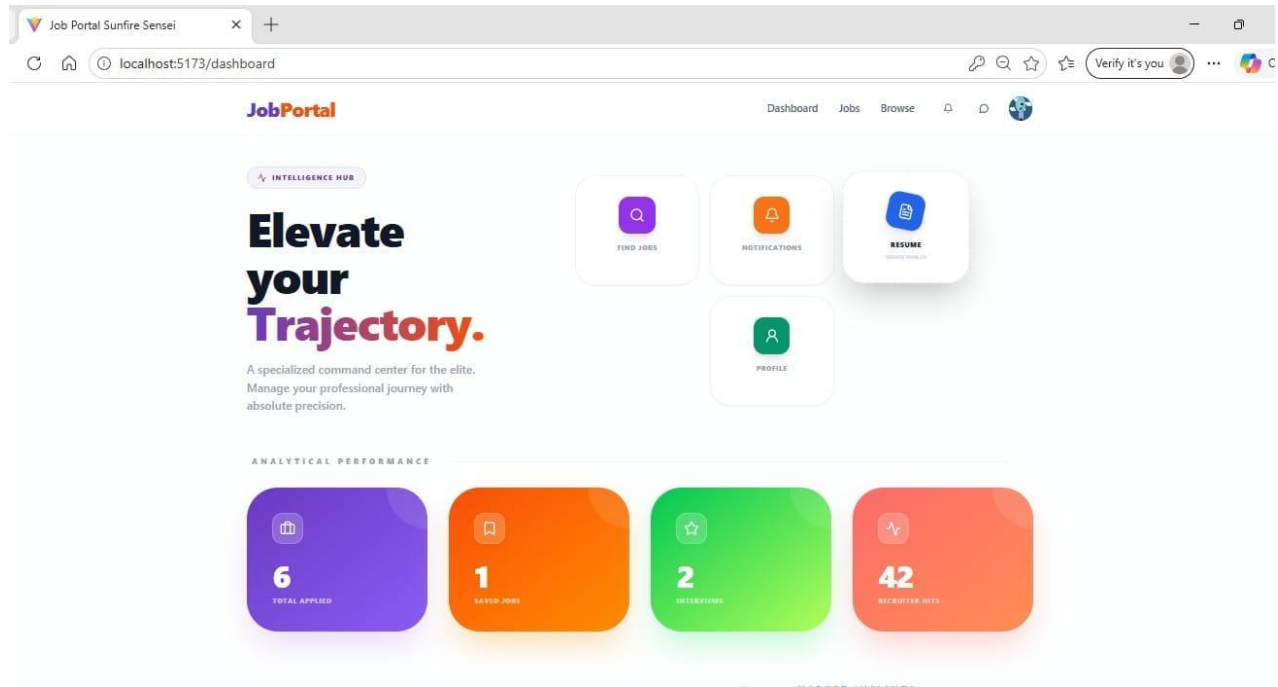

Documentation Includes:

- Super Admin Dashboard
- AI Resume Builder
- Notification System
- Message Panel
- UI/UX Design

Output:

- Final report completed
- Ready for submission

Project Output :

Summary Of Work Done ll Date :

- Completed full **system testing**
- Fixed all **bugs and issues**
- Improved **performance and speed**
- Finalized **UI/UX design**
- Completed **project documentation**

☞ The system is now:

- Fully functional
- Stable and optimized
- Ready for deployment

Total Working Hrs: _____

Signature of Student:

The above entries are correct and the grading of work done by Trainee is

Excellent	Very Good	Good	Fair	Below Average	Poor
