Internal Faculty Guide Name:	Prof. Himani Patel			

Week 10 – Super Admin Dashboard & AI Resume Builder:

Objective:

- Create a **super admin dashboard** with full control.
- Integrate **AI resume builder**.
- Start **UI/UX design enhancements**.

Monday – Super Admin Dashboard Setup

Work Done:

- Created **super admin login page** with authentication.
- Implemented **dashboard layout**: sidebar menu, top navbar.
- Added **user and job management panels**.

Code Example (Node.js + React):

```

1 // Super Admin Login Check
2 app.post("/admin/login", async (req, res) => {
3   const { email, password } = req.body;
4   const admin = await Admin.findOne({ email });
5   if(admin && await bcrypt.compare(password, admin.password)){
6     res.json({ status: "success", admin });
7   } else {
8     res.json({ status: "error", message: "Invalid credentials" });
9   }
10 });

```

Output:

- Super admin can login, see dashboard with menu options: Users, Jobs, Messages, Notifications.

Tuesday – Dashboard Features

Work Done:

- Added CRUD functionality for users and jobs.
- Implemented statistics widgets: total users, jobs, applications.

Code Example:

```

1 // Fetch user stats
2 app.get("/admin/users", async (req, res) => {
3   const users = await User.find();
4   res.json(users);
5 });

```

Output:

- Dashboard displays total counts dynamically.
- Admin can add/update/delete users and jobs.
-

Wednesday – AI Resume Builder Integration

Work Done:

- Integrated AI resume generation feature.
- Admin can upload user details and generate PDF resume.

Code Example (Node.js + AI API):

```
app.post("/generate-resume", async (req, res) => {
  const { name, skills, education } = req.body;
  const resumeText = `Name: ${name}\nSkills: ${skills.join(", ")}\nEducation: ${education}`;
  // Convert to PDF
  const pdf = await pdfGenerator(resumeText);
  res.download(pdf);
});
```

Output:

- Resume generated dynamically based on input.
- PDF can be downloaded by admin or user.

Thursday – Message Panel & Notification System

Work Done:

- Created **message panel** for admin to communicate with users.
- Implemented **email notifications** using NodeMailer.

Code Example:

```
1 // Send notification email
2 const nodemailer = require("nodemailer");
3 async function sendEmail(to, subject, text){
4   let transporter = nodemailer.createTransport({
5     service: "gmail",
6     auth: { user: "admin@gmail.com", pass: "password" }
7   });
8   await transporter.sendMail({ from: "admin@gmail.com", to, subject, text });
9 }
```

Output:

- Admin can send messages to users.
- Users receive **email notifications** for new jobs or messages.

Friday – UI/UX Design & Weekly Summary

Work Done:

- Improved **UI/UX**: color themes, responsive dashboard, better icons.
- Added **filters and search** in user/job tables.

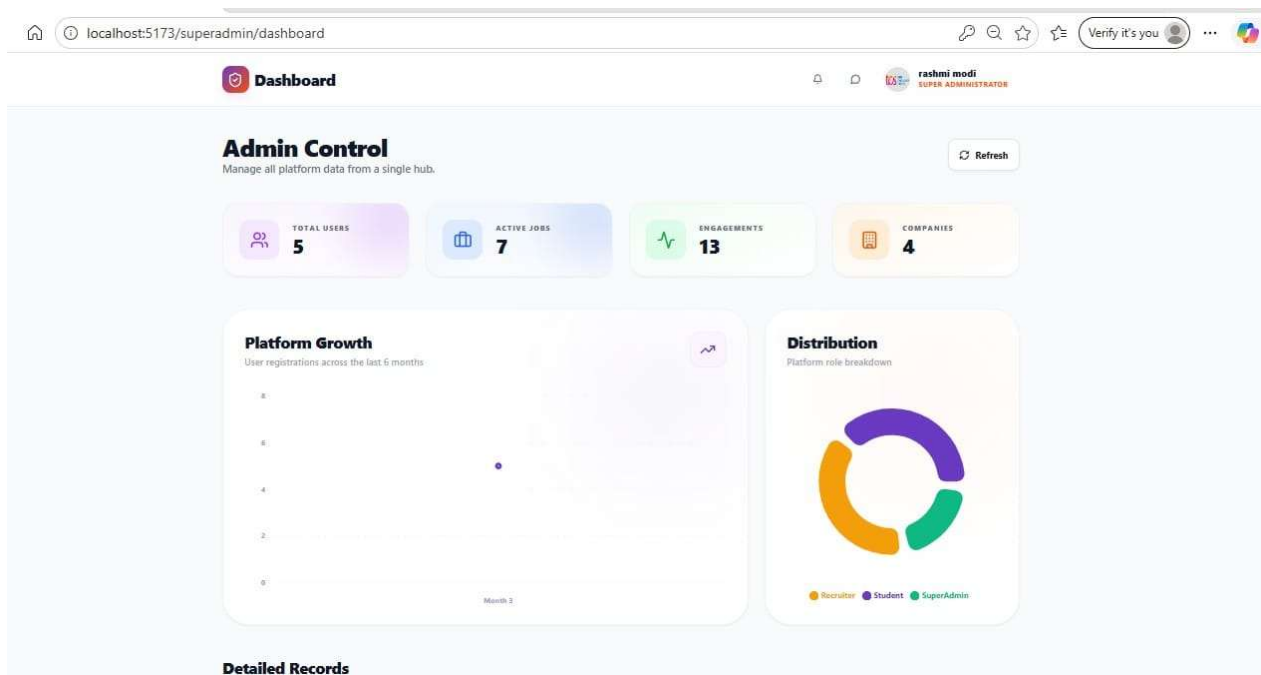

Code Example (React CSS):

```
/* Responsive dashboard */
.dashboard {
  display: flex;
  flex-wrap: wrap;
}
.card {
  border-radius: 10px;
  padding: 20px;
  box-shadow: 0 2px 10px rgba(0,0,0,0.1);
}
```

Output:

- Dashboard fully responsive, user-friendly.
- Week 10 work completed: **Super admin dashboard + AI resume builder + UI updates + message/email system.**

Summary Of Work Done till Date :

- Developed **Super Admin Dashboard** with login, sidebar, and control panel features.
- Implemented **User and Job Management (CRUD operations)** with dashboard statistics.
- Integrated **AI Resume Builder** for generating resumes dynamically in PDF format.
- Added **Message Panel and Email Notification System** for communication between admin and users.

Plans for next week:

- **Final system testing** for dashboard and AI resume.
- **Enhanced notification system** (push notifications).
- **Complete message panel testing**.
- Continue **UI/UX improvement**.
